CONSENT FORM EFT

EFT is a procedure which involves tapping on several acupressure points on the face and body, humming, counting and rolling of the eyes. Thousands of people have used this technique and the number of complaints is under 1%. Negative side affects reported have been few, but mainly consist of slight nausea, the beginnings of emotional upset, sleepiness and recovered memories of emotional trauma. Continued tapping during the session usually neutralizes these aspects.

I (Victoria DeAnna Brill, L.AC) do not assume responsibility for any possible negative side affects. The responsibility for your emotional and physical well being must rest with you. Please read the following statements carefully:

I (Victoria DeAnna Brill) am a licensed Acupuncturist in the State of Washington. I am not a psychologist and have had no licensing or training in that field. I am a registered counselor in the State of Washington.
